

Alexander Tyutin

DevSecOps & Platform Engineer | Cloud & AI Architecture | GDG Almaty Organizer Almaty, Kazakhstan

Contact: tyutinalexkz@gmail.com | [LinkedIn](#) | [Dev.to](#)

Summary

Adaptable DevSecOps and Platform Engineer with a proven track record of bridging the gap between robust security and high-velocity developer productivity. Holder of four Google Cloud Professional certifications (Architect, Security Engineer, Network Engineer, Generative AI Leader) - a combination that enables end-to-end ownership of secure, cloud-native AI platforms. Experienced in designing cost-effective, scalable AI platforms on GCP, automating complex infrastructure workflows, and embedding AI/LLM integrations into developer environments. Currently deepening expertise in ML Engineering. A passionate community leader, youth advocate, and technical mentor.

Top Skills

- **Engineering & Infrastructure:** Cloud-Native Architecture, GCP (Cloud Run, Vertex AI, VPC, Cloud Armor), Kubernetes, Docker, Microservices Mesh, OIDC Service-to-Service Auth, GCP Networking (VPCs, firewall policies, hybrid connectivity), Platform Automation (Python, Ansible, Bash).
- **AI & Platform:** Local LLMs, AI Quality Gates, Prompt Injection Defense (OWASP LLM), Google Cloud Model Armor, Vertex AI. (*Actively learning: ML Engineering*)
- **Security & Strategy:** DevSecOps, GCP Secure Workload Design, Continuous Vulnerability Assessment, Software Composition Analysis (SCA), Bug Bounty Management, PCI DSS, Security by Design.

Publications & Tech Blog

Experience

Semrush (an Adobe Company)

DevSecOps & Platform Engineer *October 2022 - Present*

- Designed and built the first unified Software Composition Analysis (SCA) process from scratch using Python and Ansible automation.
- Spearheaded DevSecOps advocacy, successfully driving the adoption of the SCA process across almost all engineering teams within a year through continuous maintenance and training.
- Prototyped and advocated for embedding security checks directly into the developer IDE (implemented in Technovation AI Platform project; proposing adoption across company teams).
- Designing an AI-awareness hackathon for engineering teams to demonstrate how to automate security routines and infrastructure checks using Claude Desktop/CLI and local LLMs.
- Optimized infrastructure security pipelines, focusing on platform resilience, automation, and reducing deployment friction.

Skills: Google Cloud Platform · Kubernetes · Secure SDLC · DevSecOps · Software Composition Analysis (SCA) · Ansible · Python · GitLab · Splunk

Technovation Kazakhstan

Lead AI Platform Architect & Senior Mentor *February 2024 - Present*

Charity Partnership:

- Identified a human scaling problem - volunteer mentors were too few, overloaded, and time-constrained to serve all teams - independently proposed an AI-powered mentorship platform as the solution, pitched it, and took full end-to-end ownership as CTO, CEO, and CFO; self-funded the entire project (~\$150 for the season) and delivered a production AI platform serving 100+ teams across multiple countries.
- Evolved an initial monolithic Telegram MVP into a distributed Python microservices mesh on GCP Cloud Run, demonstrating that enterprise-grade AI infrastructure does not require enterprise-level spend.
- Architected a centralized AI Gateway - a dedicated middleware service between all platform clients and Vertex AI - enforcing FinOps, security, and AI routing policy.
- Designed asynchronous multimodal orchestration pipelines with Multi-RAG (Speech-to-Text, Translation, Image Synthesis, knowledge retrieval) serving 100+ teams.
- Built a multi-layered AI security approach: Google Cloud Model Armor integrated into the AI Gateway solution, a custom LLM quality gate deployed as a Cloud Run web service for CI/CD pipeline checks, and a local LLM-based security scanner for developer IDE use (along with specified tooling).

Mentorship & Community:

- Volunteered as a senior mentor for 3 years, consistently leading teams to success, including mentoring global semifinalists and coordinating multiple teams per season.
- Pioneered the "Open Calendar" initiative, democratizing access to technical and product advice for all teams and mentors across the region.

Skills: Mentoring · Community Building · Generative AI · Google Cloud Platform (GCP) · Project Management · FinOps · Product Management · Cloud-Native Architecture · Vertex AI · Python · AI Security

Top Bank

Information Security Architect *November 2021 - September 2022*

- Engineered security designs for containerized environments (Docker, Kubernetes), including network policy design for inter-service isolation.
- Partnered directly with internal business customers to define acceptable risk levels, designing flexible risk assessment processes that allowed the business to move forward rapidly.
- Designed and implemented automated processes for continuous vulnerability assessment of Docker images and continuous risk control for Kubernetes clusters.
- Developed comprehensive security policies and audits for microservices architectures.

Skills: Kubernetes · Secure SDLC · Python · Docker · DevSecOps · Architecture · Security Architecture Design · Vulnerability Management · Risk Management

Startup

DevSecOps *January 2020 - October 2021*

- Integrated security seamlessly across the entire development lifecycle: code commit, Docker image building, artifact storage, and runtime environments.
- Partnered closely with the DevOps team to maintain infrastructure security without hindering deployment velocity.
- Designed, implemented, and maintained the Anti-Fraud system and process, including incident detection and response.
- Managed the Bug Bounty program: triaging reports, coordinating remediation, and maintaining researcher relationships.
- Defended the platform against active attacks and handled security incidents end-to-end.

Skills: Kubernetes · Terraform · Python · Docker · DevSecOps · AWS · Fraud Detection · Incident Response ·

JSC NOMAD Insurance

IT Problem Manager *December 2018 - December 2019*

- Managed IT problem and incident processes across the organization, ensuring timely resolution and coordination between teams.
- Maintained and improved enterprise-grade hardware network infrastructure (routing, VPN, firewalls, VM hypervisors).
- Designed and implemented centralized security event gathering (ELK) and automated antispyam processes based on open-source tools.

Skills: IT Service Management · Incident Management · Network Administration · Elastic Stack (ELK) · Security Operations · Linux

Tsesnabank JSC

Lead Antifraud Expert, Team Lead *August 2017 - December 2018*

- Created and managed a new Anti-Fraud Division from scratch, leading team education, process design, and incident handling.
- Designed antifraud processes and their integration into core bank processes (credit fraud, internal fraud).
- Managed the project of selecting and deploying the enterprise antifraud platform.
- Developed modules and scoring models for the enterprise Anti-Fraud system.

Skills: Python (Programming Language) · Analytics · Team Building · Fraud Detection · Team Leadership · Scoring Models · Banking Security

Tsesnabank JSC

Information Security Expert *April 2013 - September 2017*

- Participated in PCI DSS and ISO 27001 implementation across the bank.
- Developed information security policies and procedures.
- Performed information security and compliance audits.

Skills: Project Management · Payment Card Industry Data Security Standard (PCI DSS) · Auditing · Architectural Design · ISO 27000 · Security Audits · Information Security Policy · Compliance Management

JSC NOMAD Insurance

Information Security Expert *June 2010 - April 2013*

- Responsible for overall information security management, covering policy, compliance, incident handling, and team coordination.
- Built and maintained enterprise network infrastructure - an early foundation in network engineering now formalized through the Google Cloud Professional Cloud Network Engineer certification.
- Deployed information security systems and handled compliance, participating in the design of early containerized environments.

Skills: Linux · Network Design · Internal Investigations · Network Administration · Active Directory · Information Security · Network Security · Hardware networking

Speaking & Community Leadership

AppSecFest Kazakhstan 2026 | Speaker

- Presented: "From VibeCoding to Enterprise-level Specification-Driven Development: Accounting, Control,

and Management."

- Shared expertise on scaling AI-assisted development processes and governing AI products using ISO IEC 42001:2023 and Responsible AI principles.

Toastmasters: Nomads of Digital Era 2026 | *Speaker*

- Spoke on cloud security, AI governance, and empowering young STEM innovators.

Google Developer Groups (GDG) Almaty | *Organizer & Speaker*

- Co-hosted and spoke at the "Build with AI Central Asia" workshop, driving local developer adoption of Google AI technologies.

Education

North-Caucasus State Technical University Master's degree, Computer and Information Systems Security/Information Assurance (2005 - 2010)

Languages

Russian (Native), English (Professional Working)

Certifications (Google Cloud)

- Professional Cloud Architect (PCA) - [Credly](#)
- Professional Cloud Security Engineer (PCSE) - [Credly](#)
- Professional Cloud Network Engineer (PCNE) - [Credly](#)
- Generative AI Leader (GAIL) - [Credly](#)

Certifications (Other)

- Systems Security Certified Practitioner (SSCP)
